55 Park Avenue  
Park Ridge, NJ 07656

PHONE: (201) 822-3105  
FAX: (201) 391-7130  
Website: [www.parkridgeboro.com](http://www.parkridgeboro.com)

Dear Property Owner;

Prior to the closing on the sale of residential property, two certificates are required by the borough.

1. **Smoke Detector, Carbon Monoxide Certification and Fire Extinguisher Compliance:** this is a notarized affidavit by the seller that smoke detectors, carbon monoxide alarms and ABC rated fire extinguishers are installed and in operating condition. While the borough reserves the right to inspect a premise prior to issuing the certificate, in general the borough relies on the seller's affidavit.
2. **Certificate of Continued Occupancy (C.C.O.):** This application causes a review of the borough's files to determine if the seller has any open building permits or zoning violations and that the utilities, assessors and tax files are current and up to date. Again, the borough reserves the right to inspect any property before issuing the certificates. **The buyer must sign the C.C.O. application.**
  - a. The fee for the Certificate of Smoke Detector Compliance is as follows:

More than 10 business days	\$35.00
Less than 10 but more than 4 business days	\$70.00
Four or less business days	\$125.00
  - b. The fee for the Certificate of Continued Occupancy is \$25.00
  - c. The Borough has three employees who are notaries
  - d. Both certificates are issued together
  - e. Unless there are complications, the certificates should be ready within 10 business days

The applications are also available on the boro website.

## APPLICATION FOR ONE & TWO FAMILY DWELLING CERTIFICATION OF SMOKE DETECTOR, CARBON MONOXIDE ALARM & FIRE EXTINGUISHER COMPLIANCE

Dwelling Location Block \_\_\_\_\_ Lot \_\_\_\_\_  
(not mailing address) Street \_\_\_\_\_  
Municipality PARK RIDGE County BERGEN

**NOTE: ALL BOXES MUST BE CHECKED IN ORDER FOR CERTIFICATE TO BE VALID**

- Smoke detector on each level of the dwelling, including the basement; excludes attic or crawl space
- Outside each sleeping area; and within 10 feet of bedrooms
- All smoke detectors are in working order
- All carbon Monoxide alarms are in working order
- 1 ABC rated dry chemical extinguisher, no large than 10lbs. within 10 feet of the kitchen and inspected

An inspection shall be conducted by the owner or an authorized representative of the owner. The smoke detectors required above shall be located in accordance with NFPA 74; the carbon monoxide alarm(s) installed per NFPA-720. The detectors are not required to be interconnected. Battery powered detectors and alarms are acceptable. Note: AC powered and/or interconnected alarms and smoke detectors installed in homes constructed after January 1977 shall be maintained in working order. See diagrams on the back of this application for further information regarding installation.

**HOW TO LOCATE DETECTORS:**

Detectors are to be located on every level of a residence, (basement, first floor, second floor) excluding crawl spaces and unfinished attics, and in separate sleeping areas, between sleeping areas and living areas such as the kitchen, garage, basement or utility room. In homes with only one living area on one floor, a detector is to be placed in the hallway outside the bedrooms as shown in Figure 1. In single floor homes with two or more sleeping areas, two detectors are required, outside each sleeping area as shown in Figure 2. In multi-level homes, detectors are to be placed in the hallway outside sleeping areas and at every finished level of the home as shown in Figure 3. Basement level detectors are to be located in close proximity to the bottom of basement stairwells as shown in Figure 4.

**PLACES NOT TO LOCATE DETECTORS:**

To avoid false alarms and/or improper operation, avoid installation of smoke detectors in the following areas:

- Kitchens—smoke from cooking may cause a nuisance alarm.
- Bathrooms—excessive steam from a shower may cause a nuisance alarm.
- Near forced air ducts—used for heating or air conditioning—air movement may prevent smoke from reaching detector.
- Near furnaces of any type—air and dust movement and normal combustion products may cause a nuisance alarm.
- The 4 inch "Dead Air" space where the ceiling meets the wall, as shown in Figure 5.
- The peak of an "A" frame type of ceiling—"Dead Air" at the top may prevent smoke from reaching detector.

**FOR ADDITIONAL INFORMATION ON DETECTOR PLACEMENT:**

For other information about smoke detector placement consult the National Fire Protection Association's Standard No. 74-1984, titled "Household Fire Alarm Equipment." For Carbon monoxide alarms, their publication is Recommended Practice #72D. These publications may be obtained by writing to the Publications Sales Department, National Fire Protection Association, Batterymarch Park, Quincy, MA. 02269.

**INSTALLATION OF CARBON MONOXIDE ALARMS** are to be located in every separate sleeping area per NFPA 72D and manufacturer's recommendations.
