

How to Use Your Water Meter to Check for Leaks

Most of Park Ridge's water meters have a "**LEAK INDICATOR**". The leak indicator will spin even if the smallest amount of water is passing through your meter. If you have all of the water turned off in the house and the leak indicator is moving, water is leaking somewhere.

**LEAK INDICATOR
ROTATES EVEN FOR
VERY SMALL**

Another tip is to read the meter at night and then first thing in the morning. If there is an increase in the reading, water is leaking in your home.
