

FOR IMMEDIATE RELEASE - JUNE 2024

TANS, Taxpayers for Aircraft Noise Solutions, is changing its name and expanding its scope of research, education, and solutions. Today we become **TANS²** adding Safety to our mission. In addressing this challenging issue, an issue that affects the quality of life of all residents in the path of Teterboro Air Traffic, we have been met with resistance from the FAA, PANYNJ and our elected officials to help us solve this issue often in the name of safety. That is why we are adding Safety to our mission.

Taxpayers for Aircraft Noise Solutions & Safety, **TANS²**, will now educate ourselves on how Teterboro Air Traffic affects the safety of our environment, health, wellness and community. **TANS²** will focus on the volume, frequency, altitude, and size of aircraft entering and exiting Teterboro and how they impact the safety of the residents below and those that are its neighbors. We understand controlling air traffic is a complex issue. However, we believe there are workable solutions and our voice, the voice of residents adversely impacted by the excessive air traffic in and out of Teterboro Airport, is valid, important and needs to be heard.

Anyone who deems this a valid mission can join us. Please email us at tanspvnj@gmail.com. Each area surrounding Teterboro Airport may have its own unique issue to be resolved. We support all that are battling this complex issue. Please share our mission. Visit our website www.parkridgeboro.com/committees/tans to read about us and what has been done thus far.
